Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

This office action is in response to the Amendment filed 24 September 2003.

Claim Rejections - 35 USC § 103

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

All 35 USC § 103 rejections stated in Paper No. 7 are maintained.

Response to Arguments

Applicant's arguments filed 24 September 2003 have been fully considered but they are not persuasive.

Applicant contends that the Nakagawa reference does not teach the instant invention because he does not use an assembly to move the insert to thereby compress the molding composition during molding. This is not persuasive because although he states in Column 9, lines 60-65 that the pressure force of the insert is due to the clamping force of the clamping cylinder, said clamping cylinder acts directing upon the cylinder which moves the molding insert (Column 4, lines 20-50). Therefore, movement of the clamping cylinder causes movement of the assembly which applies pressure to the insert. In sum, the insert is moved by an independent assembly, resulting in compression of the molding composition, teaching applicant's claims.

Applicant contends that the Nakagawa reference does not teach the instant invention because he does not disclose a first negative form arranged on the opposing end faces of the

plates of the mold. This is not persuasive because Nakagawa clearly discusses the mold cavities formed by the top and bottom mold (i.e. having a first form) and their ability to produce molded articles by creating cavities (Column 3, lines 5-9).

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
